CORION REPORT

MONTHLY CIS INSIGHTS
JUNE 2019

JUNE 2019

THE ENVIRONMENT

- The Equity market advanced 4.8% for the month, recovering the losses experienced in May. All major sectors ended the month in the green. Financials, Industrials and Resources rose 1.4%, 4.4% and 10.3% respectively.
- The Rand gained 3.4% against the dollar, despite the SA economy contracting 3.2%, as global monetary policies continued with a more dovish tone. Bonds advanced 2.3% while Property gained 2.2% for the month.
- The top performing shares were dominated by Resource companies. Amongst the best performers were AngloGold (30.5%), Gold Fields (17.3%), Anglo American (15.6%) and Anglo-American Platinum (15.6%).
- SA Inc stocks were amongst the worst performers for the month, as the GDP shock added to an already depressed economy.

GENERAL

Performance numbers and graphs are sourced from Morningstar (Pty) Ltd using NAV to NAV figures. However the returns shown are only signed off after the 5th business day post month end. Consequently distributions for some funds might not be reflected in the return data and some fund returns are subject to change. The investment performance is for illustrative purposes only. The investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date.

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests may go down as well as up. Investors should take cognisance of the fact that there are risks involved in buying or selling any financial product, that the past performance of a financial product is not necessarily indicative of the future performance and that the value of financial products can increase as well as decrease over time, depending on the value of the underlying securities and market conditions. Portfolios which contains offshore exposure can result in additional material and other risks, potential constraints on liquidity and the patriation of funds.

- (a) collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending;
- (b) a schedule of fees and charges and maximum commissions is available on request from the manager; and
- (c) a statement that the manager does not provide any guarantee either with respect to the capital or the return of a portfolio.
